

Software LinkMaker | LON Integration Tool for TOUCHLON color

LON Integration Tool with autobind function for TOUCHLON color

FEATURES

Software for designing, installing, operating and maintaining open and interoperable LONWORKS® control networks of several manufacturers.

LinkMaker allows creating of network bindings between several LON devices using a TOUCHLON color Touch Panel for network management function.

- adapted for small networks with max. 63 devices
- **no credits**
- field installation without PC hardware, only with the help of TOUCHLON
- quick and easy substituting installed LON components (without PC hardware)
- userfriendly graphical interface
- **cost-efficient**
- easy handling
- Transferring LinkMaker definitions to TOUCHLON via Ethernet
- Binding of SNVT and UNVT possible (no CPs)

FUNCTIONS

- 1 Import any LON devices by means of xif-file
- 2 Predefine network connections between datapoints
- 3 Export these definitions to TOUCHLON and commissioning network with integrated autobind function in Software TouchMaker using the LON-Service-PIN message.

Autobind-Funktion

Gerät	NeuronID	ProgramID	State
Touchlon	80000008100E	90000008150A0423	●
Sensor Innen	00042A5CE000	9000000A000A040E	●
Sensor Aussen	000422367000	9000000A000A040E	●

Fehler: Keiner

SPECIFICATIONS

PC requirements

OS	Windows 2000/XP/Vista/7 (other on request)
CPU	Intel Pentium 1.0 Ghz+ or compatible
RAM	min. 512 MB
Harddisk	32 MB free
Graphic	resolution min. 1024x768

Following restrictions are valid for every network which was defined in LinkMaker network:

network variables	16384 network variables (total numbers network)
channels	1
devices	max. 63
domains	1
subnets:	1

Bindings will be set up internal as group binding, the assignment of variables is made by selectors.
